## Summary

- **Technical Lead & Architect:** Experienced working on fintech ecosystem, designed and developed a stock purchase plan integration with the Empower system, successfully migrating **\$800M+ in assets**.
- **Performance Optimization:** Engineered an 'Integration Hub' to centralize internal API communication, **reducing total calls by 60%** and cutting service latency by half.
- Authored architectural design documents and coordinated cross-functional implementation to deliver mission-critical applications under **tight deadlines**.

## Experience

### SENIOR SOFTWARE ENGINEER | EMPOWER | MARCH 2025 – PRESENT

- Developed a **highly available** stock purchase plan service using event-driven architecture (Kafka, Amazon MSK, EKS, and Java), enabling the seamless migration of **\$800M+ in assets** to the Empower platform.
- Designed and engineered a centralized 'Integration Hub' for service-to-service communication, **slashing internal API calls by 60%** and reducing service latency by **50%** utilizing Relational (Amazon Aurora, Oracle) & NoSQL Databases (MongoDB).
- Collaborate with stakeholders across Payments, Personal Capital, and Retirement Management to drive large-scale migrations and new feature development.
- Winner of the **Empower 2025 Hackathon** (AI Financial Planner Agents); lead internal engineering talks and mentor team members to foster a culture of technical excellence.

### SOFTWARE ENGINEER-III | JPM CHASE & CO | FEBRUARY 2023 – MARCH 2025

- Led a developer team in migrating the Customer Maintenance application to AWS, leveraging EKS, EC2, and Direct Connect.
- Engineered a Java/Spring Boot and Kafka-based integration service to successfully onboard **1M+ users** from a third-party bank to Chase.
- Partnered with Mission Control to resolve production failures, utilizing **Splunk, Dynatrace, and Datadog** for rapid debugging and monitoring.

### SENIOR SOFTWARE ENGINEER | LEXIS NEXIS | FEBRUARY 2021 - JANUARY 2023

- Built a Spring Boot and Angular data-sharing platform, improving agency satisfaction by **60%** through seamless data exchange.
- Scaled API testing by authoring **Python/Locust** performance scripts and implementing robust unit/integration tests via Postman and mock frameworks.

### SOFTWARE DEVELOPER | DELOITTE | JULY 2019 - FEBRUARY 2021

- Delivered development and production support for the Michigan Bridges J2EE application, ensuring system stability and performance. Engineered a **batch job processing system** to automate data generation for new features, utilizing BDD and rigorous unit/integration testing.

**SOFTWARE ENGINEER | LEAPFROG TECHNOLOGY INC. | JULY 2013 - MAY 2016**

## **Education**

Master of Science in Computer | May 2019 | University of North Dakota, ND, USA

Bachelor of Computer Engineering | June 2013 | Tribhuvan University, Nepal

## **Skills & Abilities**

- Attention to Details
- Problem Solving
- Quick Learner
- Poised Under Pressure
- Team Leadership

## **Certifications**

- AWS Certified Solutions Architect – Associate, 2023
- Certified Kubernetes Application Developer (CKAD), 2024
